## Household Water Purification Kits

**Diarrhoea caused by drinking contaminated water is still a leading cause of illness and death among infants and children in the developing world. Around 1.8million children die every year as a result of diseases that cause diarrhoea.**

Butyl Products Household Water Purification Kits are designed to help prevent some of those illnesses by providing the means to transform dirty, discoloured water into clean, safe drinking water at household level.

The Kits are available in two formats, for both turbid and non-turbid water.

Household Water Purification Kit for non turbid water contains 2 large plastic buckets: one for the collection of dirty water and one with a tap for water purification to avoid cross contamination with a supply of NaDCC Aquatabs to purify enough water for a family of five for up to 30 days.

This kit is supplied per pallet.

Each pallet 1.20 x 1.20 x 1.50m

Kits per pallet:

80 suitable for up to 400 people

Household Water Purification Kit for turbid water contains 2 large plastic buckets: one for the collection of dirty water and one with a tap for water purification to avoid cross contamination plus a supply of P & G Water Purification sachets to clean and purify dirty water for a family of five for up to 30 days.

This kit is supplied per pallet.

Each pallet 1.20 x 1.20 x 1.50m

Kits per pallet:

80 suitable for up to 400 people
