

Emergency Aid Camp Infrastructure

Aquatabs®

Aquatabs water purification tablets are recognised worldwide for their use in emergency situations and disaster zones.

They are the largest selling brand of water purification tablet, used for over 2 decades by major aid agencies, Health Ministries, NGOs, peacekeeping & defence forces and relief organisations globally, making water safe to drink for over 13 million users daily.

Aquatabs are effervescent, dissolving easily in water. The US EPA approved active ingredient is NaDCC, also known as Sodium Dichloroisocyanurate or Troclosene Sodium.

Aquatabs have been independently field trialled for efficacy in over 14 countries with acceptability studies carried out worldwide. They have also been successful in comparative taste trials and are proven to be acceptable to all cultures.

Key Features Include:

- Ease of use
- Affordability
- Safe to store and handle
- Lightweight and transportable
- Proven to reduce total and faecal coliform levels (and other micro-organisms) to zero or low risk

Aquatabs are available in both small and large format tablets and can treat as little as 1 litre to 1,250 litres of water with a single tablet. For larger volumes a granular format is available packed in 5kg tubs capable of treating 550,000 litres of water per tub. All are classified safe for Air, Sea or Road transport.

Quality Assurance

The manufacture of Aquatabs is rigorously controlled and the product carries the following approvals and certifications for your complete peace of mind:

- Pharmaceutical manufacturer—Certificate of Good Manufacturing (GMP)
- Audited by HPRA (Health Products and Regulatory Authority of Ireland) to EU directive ISO 9001:2008 and ISO 13485:2002
- Fully audited batch tracking system with samples of each batch retained for shelf life +1 year
- Stability studies conducted according to ICH (International Committee on Harmonisation) guidelines
- NSF approved for 10mg per litre (not all products have this)
- Quality control analysis by a dedicated team of highly skilled technical personnel to PhD standard
