

Emergency Aid Camp Infrastructure

Aquatabs Flo®

Where to use Aquatabs Flo®

- Attic and ground tanks
- Community water points
- Schools
- Small Medical Centres
- Private wells & group water schemes
- Water Kiosks
- Hospitals

A low cost water purification system. It brings the chemistry of Aquatabs from "point-of-use" so that water is purified at "point of entry".

Its simplicity works on the flow of the water with no power, moving parts or maintenance required.

This small, easy to use purification unit not only makes your water safer, it will continue to protect the water within your system. It can be used in new and retrofit situations and is very simple to install in most header/ground tanks for private, grouped water schemes, small medical centres, schools and even rain water harvesting systems.

What is Aquatabs Flo?

Aquatabs Flo® water disinfection unit, kills microorganisms, like viruses and bacteria, in your water ensuring that Legionella is eliminated, and biofilm remains under control. This small, easy to use purification unit not only makes your water safer, it will continue to protect the water within your system. It can be used in new and retrofit situations and is very simple to install in most header/ground tanks for private, grouped water schemes, small medical centres, schools and even rain water harvesting systems. Connections will be available for hand-pumps and stand-pipes in the near future. **Aquatabs Flo®** is USEPA approved for drinking water.

Why use Aquatabs Flo?

Untreated water is at risk of contamination with harmful microorganisms and even treated water may be at risk of contamination by organisms such as Legionella if stored for a long time in a tank or piping dead-leg.

20% of well water is contaminated with bacteria including potentially fatal VTEC – (Verocytotoxigenic Escherichia coli).

Aquatabs Flo® water purification unit makes all your water safer to drink.
